

As a professional truck driver, the instant traffic reports offered by XM Radio keep me updated to constantly changing hazards. The services available on AM and FM stations can't even compare to XM's! Before I became a subscriber to satellite radio, I was at the mercy of the local radio stations for traffic reports. They may or may not give me the information I needed for the route I was on. Of course, I'd have to wait at least ten minutes till the next report (providing it was during rush hour, Monday thru Friday!). And, it may be current, and it may be just re-hashed information! This has really made my job both easier and safer since I got XM Radio. Please reject Petition 04-160 and help keep interstate commerce flowing! Thank you in advance for your support.
